EDUCATION

The Islamia University of Bahawalpur

Oct 2021-May 2025

- Bachelors in Software Engineering
- CGPA: **3.12** out of **4.00**

PUBLICATION

Manuscripts in Preparation

Title:"Bone Fracture Detection and Advisory System"

Title:"AI Feshion Recommender System"

EXPERIENCE

I have over 1.5 years of experience in MERN stack development, including 1 year of frontend development and 6 months of backend development. My primary focus has been on building responsive and user-friendly web interfaces using React.js. On the backend, I've worked with Node.js and Express, contributing to RESTful API development and integration. During this time, I contributed to the development of a **WearHub E commerce website with Ai Feshion Recommender system**, where I was responsible for both frontend and backend tasks, including UI design, API integration, and application logic.

SKILLS

❖ Programming languages

- HTML5
- CSS3
- JavaScript
- React.js
- Next.js
- Context API
- Bootstrap / Tailwind

❖ Web Development

- RESTful APIs
- Node.JS
- Express.Js
- Git & GitHub
- MongoDB

❖ Tools & Platforms

- VS Code
- Visual Studio community
- Thunder Client
- PostMan

ONLINE COURSES

COURSERA

- Web Development (01-4-2023)
- Learn JavaScript (01-7-2023)

PROJECTS

❖ [E-commerce – Web-App\(FYP\)](#) ([Working On its Backend check gitHub repo](#))

Built a responsive React.js-based e-commerce site with product listings, shopping cart, and user authentication, offering a smooth and user-friendly online shopping experience and this is wear hub [Admin Dashboard](#).

❖ [The Eagle.io 2024\(React.js\)](#)

Developed "Theeagleio", an investment platform like Forsage, built using MERN Stack and Tailwind CSS for secure and seamless user experience.

❖ [HumTek solutions](#)

Built a dynamic website using HTML, CSS, Bootstrap, and JavaScript. This project is based on a banking system and a machine maintenance service provider web application.
